Fanuc Installation and License (Authorization) Manager Instructions
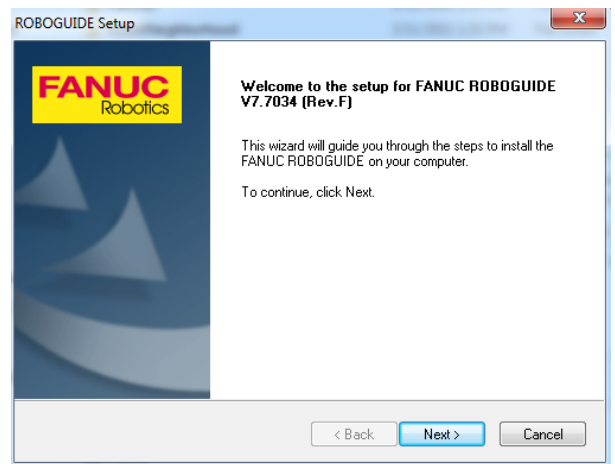

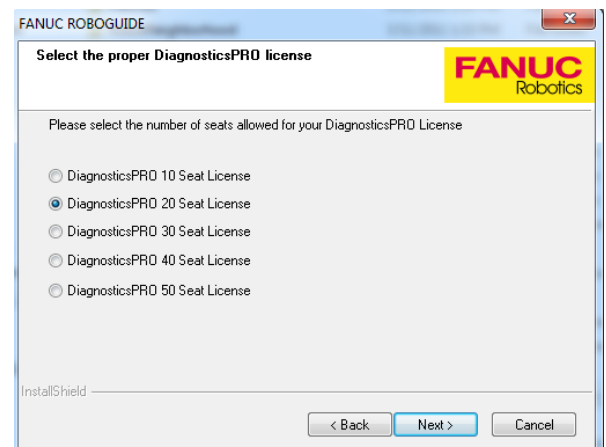

**License Manager used annually to enter new subscription licenses

1. Run setup.exe
2. Install all prerequisites
3. Installations begin when the following Welcome screen displays:

4. Accept all defaults until the "Select the proper DiagnosticsPro license screen appears and **select the 20 seat option**

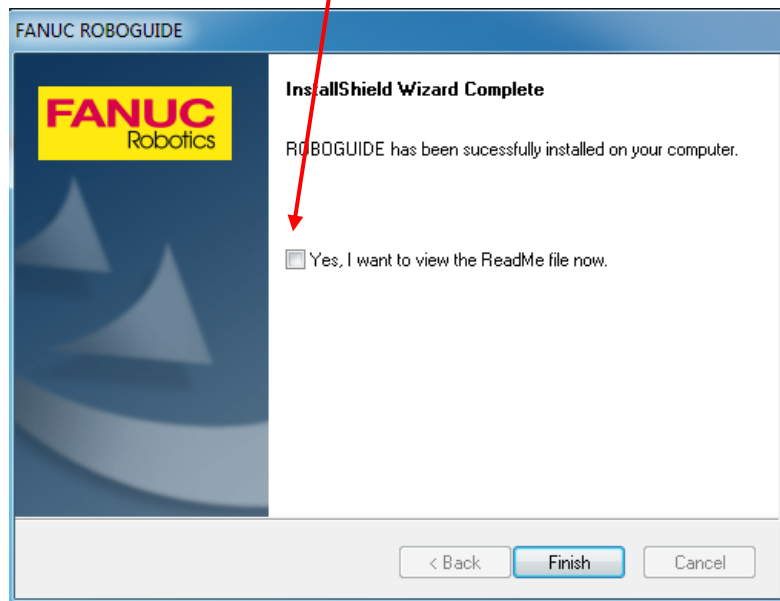

5. At the following Check which Utility Plug-ins to install screen select the options shown below
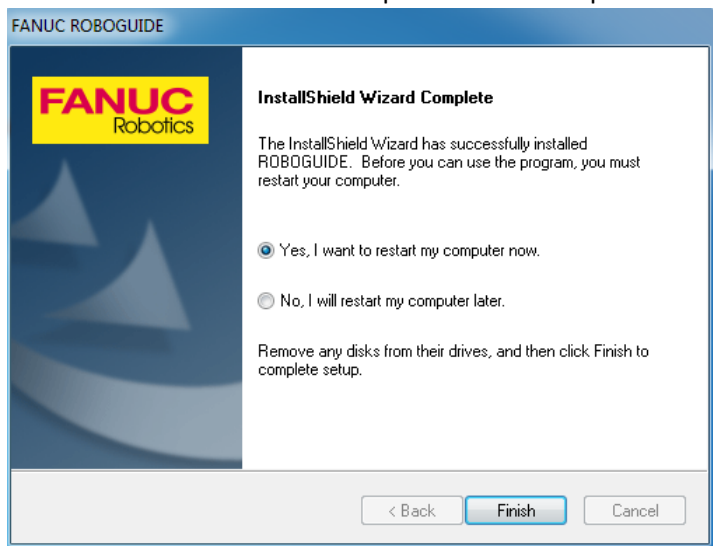

6. At the next screen accept the default

7. When the following FANUC Robotics Virtual Robot Selection screen displays select the option that is the current version being used (you may have to scroll down to see)

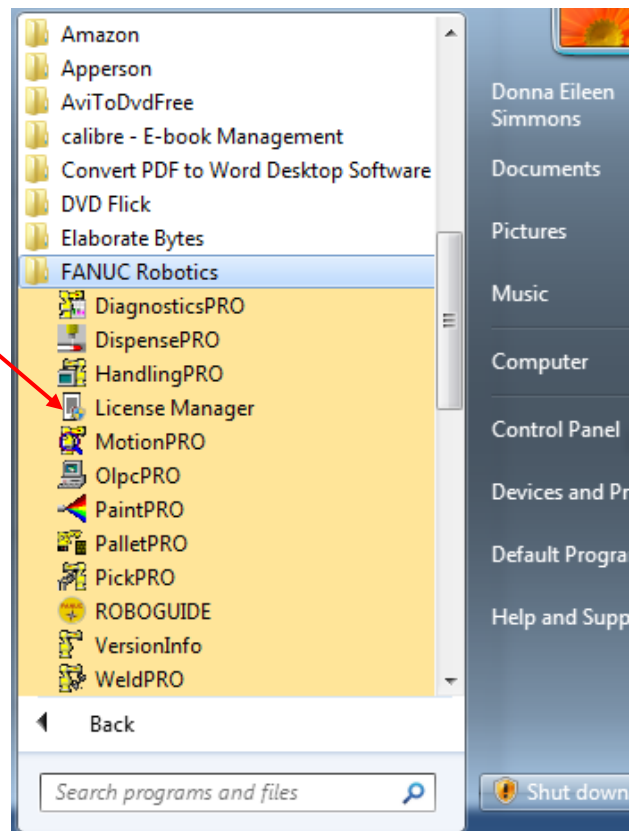

8. Accept default at next screen – installation starts again
9. At the next screen *deselect* to the Yes View ReadMe file

10. At the InstallShield Wizard Complete screen accept the default to restart the pc.

11. After rebooted go to start/All Programs/Fanuc Robotics/License manager

12. Document PC unit number and the subscription applied to unit – this is needed in the event of a hard drive failure and we need Fanuc to allow re-registering of a subscription

13. The following screen open and make sure to select SimPro – RTL-ROBOGUIDE700
   *****THIS SCREEN CANNOT BE CLOSED UNTIL THE REGISTRATION PROCESS IS COMPLETE**

14. Open up your email and also open a browser windows

15. In the open browser windows go to this url https://crc.frc.com and login

16. At the next screen select Support/Downloads tab and then Software Subscriptions from the drop down menu

17. Select Register products tab

18. At the next screen

Software Registration

Please enter the following information:
